DISCOVERY TO PRODUCTION

5 years

WEB3 · FINTECH

Product Designer with 5+ years shipping complex, data-heavy products across fintech, platforms, mobile and emerging technologies. Experienced leading end-to-end from discovery through production, collaborating closely with engineering and reducing design-to-development friction. Comfortable owning products from early exploration through implementation. Uses AI-native workflows, rapid prototyping and production-ready implementations to reduce iteration cycles from days to hours.

SELECTED IMPACT

- 3x ecosystem growth after launch
- Products used by tens of thousands of users
- Reduced prototype and delivery cycles from days to hours
- End-to-end ownership: discovery → production
- Built and shipped across consumer apps, dashboards and complex platforms

Nethermind

Product Designer

May 2024 – Present · Full-time · Remote

- Led design for **Boop** — biometric payment & identity app for iOS and Android. End-to-end ownership: discovery, research, interaction design, design system, and developer handoff across the consumer app and vendor app.
- Delivered production-ready HTML/CSS prototypes alongside design files, reducing engineering ambiguity and accelerating product delivery.
- Designed and launched **Aztec Node Explorer** — a real-time network analytics platform contributing to 3x ecosystem growth within 6 weeks post-launch, scaling to 142+ live nodes across 10+ countries and peaking at ~195 nodes.
- Led design for **SyntropyX** — complex multi-chain DeFi vault platform covering deposit, borrowing, and yield flows across BTC, ETH and more; full design system and documentation ownership.
- Led **Restaking.Info** — Ethereum restaking analytics dashboard with operator tracking, TVL charts, and LST distribution views.
